Developing tomorrow's networks, today

# THE TELENCO GROUP

## A global offer for telecoms networks

Telenco “develops the networks of tomorrow, today”, by designing, manufacturing, and marketing solutions standard and tailor-made for FTTH, FTTA networks, Datacentre and LAN.

Driven by the ambition to become a key player in the industry, Telenco has enriched its offer over the years and offers a vast choice of equipment for the installation and maintenance of networks, as well as certified training for qualified teams!

# TELENCO

## A specialist supplier of telecommunications equipment for professionals.

Telenco is a group of companies specializing in the design, manufacture and marketing in France and abroad of long-term solutions for telecoms and connectivity infrastructures. Since 1999, the company has built its business on offering innovative solutions that meet the specific needs of each market. Telenco also supports its customers by supplying high-quality hardware and equipment tailored to their needs. The attractiveness and diversification of our offering is made possible by partnerships with our customers and suppliers, all recognized in their fields of expertise.

### Innovate

Take inspiration from our customers and their experiences to develop useful solutions.

### Accompany you

Advise, deliver the right product at the right time and at a good place.

### Happy to help

Listening to all customers' needs.

#### A dedicated team

Contacts for each stage of purchasing, from pre-sales advice to after-sales service.

#### A trade counter

- Nanterre (92)
- La Possession (974)
- Saint-Joseph (972)
- Baie-Mahault (971)

#### A variety of delivery options

- Businesses
- On site
- Click&Collect

#### A dedicated website for engineers

- + choice
- + leading brands

## SERVICES

# Personalised on demand

Telenco meets the most specific needs by offering simple, efficient, and tailor-made services.

Our team works on a long-term basis to improve our services and support. All the services offered by Telenco are customisable according to the needs of customers, with the aim of making their daily lives on working within the telecommunications industry easier.

# TED<sup>®</sup>

Technical  
Efficient  
Durable

The TED<sup>®</sup> brand is the result of Telenco's commitment to improve engineer's working conditions.

By offering solutions with an unprecedented quality/price ratio on the telecommunications market, we equip engineers with equipment adapted to their needs!

## CONCEPTION & DESIGN 100% by Telenco

The technical and business knowledge of our product managers and the telecom expertise of our design office makes it possible to develop products that fulfil the field issues.

## CO-DEVELOPPEMENT with specialist manufacturers

Industrial know-how combined with the market expertise of our product managers makes it possible to create new products adapted for engineers.

# Discover **TED**<sup>®</sup> the brand dedicated to technicians.

## Innovative solutions to support engineers

Launched in 2014, TED<sup>®</sup> is a brand developed by Telenco with dedicated equipment for telecom technicians. It provides daily support technical teams during implementation and maintenance operations of telecommunications networks (FTTx/LAN/DATACENTER).

> Technical

> Efficient

> Durable

Each TED<sup>®</sup>+ product is designed with and for telecom professionals, to provide ergonomic added value that enhances the comfort and safety of every technician, while controlling costs. The genesis of many of our innovations comes from a combination of creative ideas and experience in the field.

**TELENCO**

# A responsible and sustainable company

Telenco wants to shape the future landscape of networks sustainable manner, building on its commitments and CSR initiatives.

We strive to combine economic performance and ethical principles by favouring on the one hand the protection of the environment, and on the other hand, the human value through respectful and supportive actions.

## Magnetic manhole cover lifter

TED®'s Magnetic lifter is a must have tool to safely remove manhole cover. Dedicated to telecommunication engineers, this tool was designed to be use on a dayly basis by a solo engineer. Suitable for most of the iron cover up to 100kg. Our lifter is an asset helping the reduction of MSD (musculoskeletal disorders) linked to the repetitive handling of covers.

### Technical specifications:

- + Maximum cover weight: 100kg
- + Can be used in pairs up to 200kg

### Product benefits:

- + Reduced effort
- + Optimal working posture
- + Speed of implementation

PN	Designation	Weight
09748	Magnetic manhole cover lifter TED®	18.9kg

## KEYS & COVER LIFTER

### Foldable measuring wheel

Daily tool for civil works engineers. Ideal for the precision measurement of roads, pavements up to a distance of 9999.9 meters. Compact foldable lightweight design.

TED®

#### Product benefits:

- + Compact foldable design
- + Easy to carry
- + Robust gear transmission system

#### Technical specifications:

- + Counter capacity: 0.1m - 9 999.9m
- + Folding kickstand
- + Folding handle

PN	Designation	Weight
6776	Foldable measuring wheel TED®	1.72kg

### Manhole lid hammer

TED®

The TED® manhole lid hammer can be used to unstick, lift and move telecom manholes covers. It can be used alone to lift hinged covers. Use it in pair to deal with non-hinged covers

#### Product benefits:

- + ORANGE approved
- + Replaceable and interchangeable explosion-proof soles
- + 2 sole qualities available:
  - Standard/Polyamide
  - Reinforced/Cupro beryllium: extended sole life

#### Technical specifications:

- + Movable inertia block in the handle
- + Hammer head with tip and hook sides
- + Hot-dip galvanized steel

PN	Designation	Weight
0336	TED® Manual manhole lid hammer / cupro beryllium sole	7kg
0434	TED® Manual manhole lid hammer / polyamide sole	6.5kg
13037	Sole for copper-beryllium cover lifter + Screw kit	0.7kg
5206	TED® polyamide sole for manhole cover hammer + Screw kit	0.2kg

## Manhole cover lifting hook **TED®**

Generally used in pairs to lift light manhole covers.

PN	Designation	Weight
0391	TED® Manhole cover lifting hook - 585mm	0.6kg

## Telescopic measuring rod **TED®**

The TED® measuring rod enables precise measurements on worksite. It is also used to measure the depth of telecom chambers. Its aluminum design makes it lightweight easy to carry.

### Product benefits:

- + Lightweight and easy to carry
- + Horizontal or vertical use, with integrated level
- + Carrying case

PN	Extended length	Weight
19261	5m	2.3kg

## High depth manhole access solution

### DACS double plane 8 bars

With 2 levels of 8 rungs each, this solution allows access of up to 4 meters. Made of aluminum, with replaceable anti-slip rungs, it has a long service life. Isolated level compensators are provided to adapt the device to the particularities of underground chamber bottoms. A handle for easy handling.

audinnov  
SAFETY FIRST

#### Product benefits:

- + Made for access to underground chambers
- + Non-slip rungs
- + Insulated level compensators

PN	Number of bars	Height deployed	Weight
19369	8	5.4m	17kg

In addition, consider the STANLEY pocket laser rangefinder to simply and quickly measure the depth of the chamber.

PN: 19412

### Road cones

Non-reflective tag

Bendable Beacon - Class 1

Reflective retro-beacon - Class 2

PN	Class	Height	Bands	Weighted	Conditioning	Unit Weight

17416	2	50cm	Reflective sleeves	●	Lot of 10	1.9kg
17417	2	75cm	Reflective sleeves	●	Lot of 10	4.7kg

## Aluminium manhole gateguard 1x1m TED® TED+

Foldable gateguard for use on worksite to secure telecom covers & chambers during work. Lightweight and easy to install. When folded, it is easy to transport and takes up little space in vehicles.

### Product benefits:

- + Very strong rivets
- + Leather tightening strap for storage and transportation

### Technical specifications:

- + Material: aluminum coated with red epoxy paint and white

PN	Designation	Weight
0582	Aluminium manhole gateguard TED® 1m x1m	6.75kg

## TED® telescopic bar for road cones

### Technical specifications:

- + Fixing bar extendable from 1.30 to 2.15m
- + Material: ABS
- + Adapts to all types of road cones

PN	Designation	Weight
35009	TED® telescopic bar 1.30 - 2.15m for road cones	0.6kg

## A complete range of continuous rods

Designed by Telenco's R&D teams, with engineer's support & feedback, **SAFE, SAFE NG & MAINROAD TED® Cobras** are manufactured to ensure durability & long-term daily use.

Our full continuous rod range can support an engineer dealing with most of manual underground cable pulling worksite, from the main distribution networks to the customer premise (CABLETWIST & CABLEBLITZ). Daily use means that the reparability of these products is a major challenge to ensure their durability. In addition we developed a large range of accessories to grant more flexibility to help engineers.

Detailed specifications of our rods at [www.telenco-store.com](http://www.telenco-store.com)

## Continuous rod

### Mainroad

#### Rod continuous Mainroad TED®

##### ROBUSTNESS - MODULARITY

Heavy-duty Continuous premium fiberglass rods. Designed to meet cable pulling & Drawrope deployment job site requirements.

Its modular conception enables several working positions to offer more flexibility. Assembled on a tubular frame equipped with all roads wheels, TED® Cobras are manufactured to ensure durability & long-term daily use. Equipped with two switchable guiding rings, placed on the lower & upper positions of the frame, it makes it possible to take advantage of the best angle to access the duct.

During the re-winding, the upper position use the rod's energy to assist the re-winding process & prevent engineer's back issue. The possibility to replace the rod with a secured and quick process makes the TED®'s rods an economic & durable solution.

##### Product benefits:

- + All road solid wheels
- + 4 work positions available
- + One man job rod replacement process

PN	Diameter	Length	Weight
91028	9mm	150m	36kg
1001220	9mm	200m	40.6kg
1001221	11mm	150m	44.2kg
1001222	11mm	200m	52 kg
1001223	11mm	250m	58.6kg
91027	11mm	300m	65.2kg
1001224	11mm	350m	72kg
1001566	14mm	100m	50kg
1001567	14mm	150m	60kg
1001568	14mm	200m	70kg

## Replacement rod without frame

### Replacement rod for Mainroad TED®

Replacement rod for continuous rod. Already calibrated and secured, ready-to-be installed on TED® Mainroad cage. Direct installation on the Mainroad frame with cable ties.

The rod reel is released only after being secured into the cage. This replacement system is safer than the unwinding/winding of the reel. Installation can be carry out by a solo engineer.

#### Product benefits:

- + Engineer's safety first
- + Time saving solution
- + Economic

#### Technical specifications:

- + Premium fiberglass quality

PN	Diameter	Length	Weight
91029	9mm	150m	14kg
1001225	9mm	200m	18kg
1001226	11mm	150m	19.8kg
1001227	11mm	200m	26.4kg
1001228	11mm	250m	33kg
91030	11mm	300m	42kg
1001229	11mm	350m	46.2kg
1001571	14mm	100m	25kg
1001572	14mm	150m	35kg
1001573	14mm	200m	50kg

## SAFE & SAFE NG Continuous rods

### Rod continuous SAFE NG TED®

#### STABILITY - LIGHTNESS - FLEXIBILITY

SAFE & SAFE NG design enables 2 work positions, either in a vertical or horizontal position to take advantage of the best angle to access the duct. Continuous SAFE NG rods are equipped with an external short range brake system. Equipped with a drawrope pulling guide. Highly resistant to abrasion and PVC coated fiberglass. Enhanced durability with a dedicated range guide tips and repair kit.

### Safe

The horizontal position on the 3 feet frame is particularly suitable for working on unstable or slippery ground (earth, gravel, pavement...).

Available in Ø4.5mm, Safe rods also feature an automatic automatic brake system.

#### Product benefits:

- + More stable and secure horizontal working position
- + Compact, lightweight frame
- + 3 feet with gripping feet

PN	Diameter	Length	Weight
0807	4.5mm	30m	3.8kg
0561	4.5mm	60m	4.4kg
1831	4.5mm	80m	4.8kg

### Safe NG

This new generation of frame offers enhanced rod durability with interchangeable guiding rings. An improved brake system to improve technician safety.

Available in Ø7mm, it's an excellent compromise between tensile strength and elasticity.

#### Product benefits:

- + Interchangeable guiding rings
- + Technician safety enhanced by ¼-turn external brake (increased reactivity)
- + Reinforced frame for enhanced stability

PN	Diameter	Length	Weight
1001199	7mm	60m	10.4kg
1001200	7mm	80m	11.6kg
1001201	7mm	100m	12.5kg
1001202	7mm	130m	13kg

### Replacement rod without frame

PN	Diameter	Length	Weight
0809	4.5mm	30m	0.7kg
0810	4.5mm	60m	1.35kg
0921	4.5mm	80m	1.84kg

# Cable grip

## Single loop cable pulling grip M5

Galvanized steel cable grip designed for manual pulling. Fitted with M5 end cap. Fits our Cablegrip (PN: 15536) and Cabletwist (PN: 16608) rods.

## Junior single loop cable blitz

Galvanized steel cable grip. Suitable for manual overhead and underground pulling.

## Single loop cable grip special for optical fiber cables

Short, small-diameter model suitable for pulling optical distribution cables.

## Single loop cable grip standard

Standard model in galvanized steel for overhead or underground cable grip.

## Kevlar® double loop cable grip

Kevlar® cable grip offering great flexibility and strength. Specially designed to reduce friction forces with cables already installed.

## vLoc3-Cam probe detector

The 3-Cam probe finder allows you to quickly and accurately locate the position of a probe. An intuitive interface guides the user to the probe using a directional arrow. When the detector passes over the probe, it provides an immediate view of the probe and displays its depth in real time.

The vLoc3-Cam has a dedicated screen for searching for probes on multiple frequencies. It is compatible with all probes and cameras on the market.

The vLoc3-Cam can also locate 50Hz and radio signals in passive mode (without a transmitter). In active mode, it is compatible with all 33kHz transmitters.

PN: 19404

### Product benefits:

- + Hyper-intuitive probe search:
  - Directional arrow guides you to the probe
  - Special screen for viewing and isolating phantom signals
  - Probe visualization on screen, the probe turns red-green when the detector is plumb
- + High-visibility color display

### Technical specifications:

- + Frequencies:
  - Probe mode: 512Hz, 640Hz, 8.192kHz, 33kHz and 83kHz
  - Power: 50Hz
  - Radio: 10kHz-22.7kHz bandwidth
- + Detection down to 4m
- + Accuracy: ± 3% of depth
- + Large 10cm screen

PN	Designation	Power supply	Weight
19404	vLoc3-Cam probe detector pack + carrying case	6 AA batteries	3.6kg
18442	vLoc3-Cam sensor (Batteries)	6 AA batteries	2.1kg
19175	Li-Ion battery with charger for vLoc3 detector	-	0.54kg
18443	Carrying bag for vLoc3 detector	-	1.5kg

## Probes and accessories

### 33kHz locating microprobe

PN: 20275

PN: 19177

Retractable precision micro-probe with flexible head, to locate blockage points in small ducts & micro ducts. M5 female connector.

### 33kHz Ø18.5mm probe

PN: 4033

Robust screw-in probe to locate blockages ducts & micro ducts (breakage, plugs, etc.). M10 male end. Can be fitted to rods using an adapter (Female/Female). Adapter depends on rod design.

#### Microprobe v6:

- + Ø6.4mm
- + Length: 84mm
- + Max. detection depth: 2.3m
- + Supplied with 2 BR535 batteries

#### Microprobe v9:

- + Ø9mm
- + Length: 138mm
- + Max. detection depth: 5.7m
- + Supplied with 2 BR535 batteries

#### Technical specifications:

- + Ø18.5mm
- + Length: 82mm (probe only)
- + Max. detection depth: 4m
- + Supplied with 1 x 3V Lithium battery (CR-1/3N)

PN	Designation	Microprobe Model	Compatible rods		Mounting accessories	Weight
			Ø	Model		
20275	33kHz microprobe	V6	3mm	Cableblitz, Cabletwist, Katibliz	Screwing directly onto rod	0.01kg
19177	33kHz microprobe	V9	4.5mm	Safe	Screwing directly onto rod	0.04kg
1002410	Probe + adapter kit	18.5mm	7mm	Safe NG	Adapter supplied for 7mm	0.22kg
19178	Probe + adapter kit	18.5mm	7mm, 9mm, 11mm	Katimex	Adapter supplied	0.22kg
17360	Probe + adapter kit	18.5mm	9mm, 11mm	Mainroad	Adapter supplied	0.22kg
4033	Locating probe only	18.5mm	7mm, 9mm, 11mm	-	Adapter not included	0.18kg

## Packs for duct blockage identification

### Pack 1: Cable-Blitz micro rod + Micro probe V6 33 kHz

#### Technical specifications:

##### Kit contents:

- + Cable-Blitz micro rod Ø3mm x 30m
- + Micro probe V6 33kHz Ø6.4mm

### Pack 2: SAFE rod + Micro probe V9 33 kHz

#### Technical specifications:

##### Kit contents:

- + Safe rod Ø4.5mm x 60m
- + Micro probe V9 33kHz Ø9mm

### Pack 3: SAFE rod + Probe V18 33kHz

#### Technical specifications:

##### Kit contents:

- + Safe rod Ø7mm x 100m
- + Probe V18 33kHz Ø18.5mm

PN	Designation	UV
19975	Cable-Blitz micro rod + Micro probe V6 33kHz	Unit

PN	Designation	UV
19975	SAFE rod + Micro probe V9 33 kHz	Unit

PN	Designation	UV
19975	SAFE rod + Probe V18 33kHz	Unit

## Cable pulling van kits

### Small vans kit for cable pulling

Our pre-set packs are sold with white painted road cones (PN: 2018). We can also offer them with Class 1 (PN: 16059) or Class 2 (PN: 6218) reflective strips.

#### Package composition version 1:

- + x1 TED® SAFE continuous rod NG Ø7mm lg100m
- + x2 TED® aluminum gateguard
- + x2 AK5 "Works" signs
- + x2 AK3 "narrowed carriageway" work signs
- + x1 manhole lid hammers
- + x2 manhole cover lifting hook
- + x10 road cones

PN	Designation	Weight
13541	Small van cable pulling kit V1	66kg

#### Package composition version 2:

- + x1 TED® SAFE continuous rod NG Ø7mm lg100m
- + x2 TED® aluminum gateguard
- + x2 AK5 "Works" signs
- + x2 AK3 "narrowed carriageway" work signs
- + x2 manhole lid hammers
- + x10 road cones

PN	Designation	Weight
16061	Small van cable pulling kit V2	68kg

### Large vans kit for cable pulling

Our van pull packs are sold with white road cones (PN: 2018). We can also offer them with Class 1 (PN: 16059) or Class 2 (PN: 6218) reflective strips.

#### Package composition version 1:

- + x1 TED® MAINROAD continuous rod Ø11mm lg300m
- + x2 TED® aluminum gateguard
- + x2 AK5 "Works" signs
- + x2 AK3 "narrowed carriageway" work signs
- + x2 manhole lid hammers
- + x4 manhole cover lifting hook
- + x10 road cones

PN	Designation	Weight
13542	Large vans kit for cable pulling V1	130kg

#### Package composition version 2:

- + x1 TED® MAINROAD continuous rod Ø11mm lg300m
- + x2 TED® aluminum gateguard
- + x2 AK5 "Works" signs
- + x2 AK3 "narrowed carriageway" work signs
- + x2 manhole lid hammers
- + x10 road cones

PN	Designation	Weight
16062	Large vans kit for cable pulling V2	122kg

## Customer premise micro rod

### Rods

#### Cabletivist rod

TED®

TED Cabletivist rod is designed to facilitate the deployment of optical fiber drop cables in house ducts with several bends. Its synthetic composition makes it more flexible and particularly resistant even in the tightest bends. Its twisted monofilament structure enables to significantly reduce the coefficient of friction in the duct.

It also provides an efficient transmission of twisting movements along the length of the rod to get past any blocking points.

##### Product benefits:

- + Good compromise between flexibility
- + Twisted structure for a lower friction coefficient

##### Technical specifications:

- + Rod diameter: 4mm
- + Length: 30m
- + Robust carry cage

PN	Model	Weight
16608	Cabletivist rod only	1.2kg
17386	Cabletivist rod + pull handle	1.25kg
37004	TED® storage pouch for Cabletivist needle accessories	0.05kg

## Cable-blitz FTTP micro rod duct rod

Fibreglass micro rod duct dedicated solution for last mile customer's premise drop cables deployment. This product's main benefit: its 4mm diameter FTTP-dedicated flexible guide head that makes it an optimal solution for deployments in electric conduits, already occupied with a cable (telecom, video etc.). The fiberglass pulling rod CABLE-BLITZ from TED® is inspired of telecom engineer's everyday challenges. Designed with a handle to be easily carried in a solid cage that protects the fiberglass rod during interventions and transport.

**Product benefits:**

- + 3mm premium fibreglass
- + Dedicated for last miles in house & building deployment
- + Specific tip for occupied duct deployment

**Technical specifications:**

- + Rod diameter: 3mm
- + Length: 30m up to 50m
- + Equipped with a specific FTTP 4mm flexible tip
- + Robust carry cage with built in handle

PN	Model	Weight
15536	Cableblitz micro rod 3mm lg 30m + accessories	1kg
15924	Cableblitz micro rod 3mm lg 30m + accessories & gripping tool	1.05kg
15037	Cableblitz micro rod 3mm lg 30m + accessories + 30m replacement rod	1.45kg
6032	Cableblitz 3mm 30m replacement rod	0.5kg

## Nylon thread puller

High flexibility 3mm nylon rod dedicated for short with a lot of bends for in house customer premise connection & multi dwelling deployment.

**Technical specifications:**

- + 6mm end tip
- + Nylon rod
- + Robust carry cage with handle

PN	Model	Length	Weight
17464	Nylon thread puller Ø3mm length 20m	20m	0.9kg

# DUCT CUTTERS & SCORING TOOLS

## Micro duct & duct cutter

**Axial duct cutter for HDPE micro-tube  
14mm max**

PN	Designation	Weight
1000767	Axial duct cutter for HDPE micro-tube 14mm max	0.55kg

**Axial duct cutter for HDPE micro-tube  
28mm max**

PN	Designation	Weight
1000768	Axial duct cutter for HDPE micro-tube 28mm max	0.70kg

**Axial duct cutter for tube 64mm max**

PN	Designation	Weight
1000769	Axial duct cutter for tube 64mm max	0.52kg

## Micro duct & duct scoring

**360° rotating pipe cutters  
Ø26 - 40mm**

PN	Designation	Weight
1000770	360° rotating pipe cutters Ø26 - 40mm	0.49kg
1000774		

**HDPE circular duct cutter  
5 to 16mm**

PN	Designation	Weight
1000777	HDPE circular duct cutter 5 to 16mm (thickness from 1.5mm to 3mm)	0.2kg
1000776	HDPE circular duct cutter 5 to 16mm (thickness from 1mm to 1.3mm)	0.2kg

## Micro duct & duct slitting

Longitudinal cutting tool for micro-tube bundle

PN	Designation	Weight
1000766	Longitudinal cutting tool for micro-tube bundle	0.18kg

Longitudinal ratchet pipe cutter RCS-30

PN	Designation	Weight
1001261	Longitudinal ratchet pipe cutter RCS-30	0.16kg

Deburrer for HDPE tubes and micro-tubes

PN	Designation	Weight
1000775	Deburrer for HDPE tubes and micro-tubes	0.03kg

# CABLE BLOWING

## Blowing gun for PVC, TPC & concrete pipes

### Blowing gun for PVC, TPC & concrete pipes

Used to blow a rope into a duct. The end of the gun seals the pipe. The central or lateral part incorporates a passage for the rope, which is attached to the pulling mandrel. Coupled with a compressor, the blowing gun propels the mandrel into the pipe, ensuring the rope deployment.

PN	Type	Dimensions*	Weight
0727	Central	Ø22/24mm	0.66kg
0416	Central	Ø25/28mm	0.63kg
0417	Lateral	Ø30/33mm	0.60kg
0729	Lateral	Ø32/40mm	0.71kg
0418	Lateral	Ø42/45mm	0.71kg
0730	Lateral	Ø47/50mm	0.90kg
0419	Lateral	Ø55/60mm	0.83kg
0420	Lateral	Ø75/80mm	1.11kg
0731	Lateral	Ø77/80mm	1.16kg
0732	Lateral	Ø96/100mm	1.37kg
0733	Lateral	Ø103/110mm	1.47kg

\*Inside/outside pipe diameter

Central blowing gun

Lateral blowing gun

### Blowing gun for PEHD ducts

PN	Type	Dimensions*	Weight
6708	Central	Ø21/25mm	0.88kg
4495	Central	Ø25/28mm	0.79kg
13072	Central	Ø26/32mm	0.78kg
4496	Central	Ø27/32mm	0.78kg
5060	Central	Ø33/40mm	0.94kg
1653	Lateral	Ø41/50mm	1.01kg

\*Inside/outside pipe diameter

### Blowing gun for PEHD micro ducts

PN	Type	Dimensions*	Inside pipe Ø acceptable	Weight
13799	Central conical	Ø8/10mm	8 to 10mm	0.27kg
11288	Central	Ø11/14 mm	11mm	0.33kg
11229	Central conical	Ø15/18mm	13 to 18mm	0.53kg

\*Inside/outside pipe diameter

## Pulling mandrels for PVC, TPC, & concrete pipes

The blowing mandrels are propelled by compressed air into ducts. Each mandrel features a ring used to fix the rope. A calibration mandrel or a lubricant guide ball can also be fixed to this ring.

Pulling mandrel  
(with front & back ring)

Pulling mandrel

Ball type pulling  
mandrel

Leather mandrel

Ball type lubricant mandrel

### Pulling mandrel (straight & ball type):

- + Up to 600m blowing distance
- + Max pressure 6 bars

### Leather mandrels:

- + Leather sides: help to limit the friction into the pipe
- + Up to 600m blowing distance

### Ball type lubricant mandrel:

- + Their metallic structure enable to go through duct blockage easier
- + More robust than a classic guiding ball type, they ensure a better duct cleaning & lubrication

PN	Type	Dimensions*	Pipe type	Weight
0405	Ball type pulling mandrel	Ø25/28mm	PVC, TPC, concrete	0.02kg
0743	Ball type pulling mandrel	Ø30/33mm		0.03kg
0744	Ball type pulling mandrel	Ø42/45mm		0.07kg
0745	Ball type pulling mandrel	Ø55/60mm		0.11kg
0746	Ball type pulling mandrel	Ø75/80mm		0.19kg
0760	Pulling mandrel (with front & back ring)	Ø30/33mm		0.03kg
0761	Pulling mandrel (with front & back ring)	Ø42/45mm		0.15kg
0762	Pulling mandrel (with front & back ring)	Ø55/60mm		0.22kg
0763	Pulling mandrel (with front & back ring)	Ø75/80mm		0.34kg
0406	Pulling mandrel	Ø30/33mm		PEHD Tube
0407	Pulling mandrel	Ø42/45mm	0.14kg	
0408	Pulling mandrel	Ø55/60mm	0.16kg

4500	Leather mandrels	Ø26/32mm	0.04kg	
4501	Leather mandrels	Ø33/40mm	0.04kg	
2442	Leather mandrels	Ø41/50mm	0.13kg	
6355	Ball type lubricant mandrel	Ø33/40mm	PVC, TPC, concrete	0.04kg
5054	Ball type lubricant mandrel	Ø42/45mm		0.1kg
11195	Ball type lubricant mandrel	Ø55/60mm		0.12kg
5056	Ball type lubricant mandrel	Ø75/80mm		0.31kg

\*Inside/outside pipe diameter

## Foam ball

Foam balls enable multiple applications. Mainly used to clean & lubricate ducts, they also help to identify duct blockages prior to any cable or rope blowing.

PN	Dimensions*	Weight
10170	Ø25/28mm	0.01kg
10171	Ø30/33mm	0.01kg
10172	Ø33/40mm	0.01kg
10173	Ø41/50mm	0.02kg
10174	Ø42/45mm	0.02kg
10176	Ø55/60 mm	0.05kg
10180	Ø75/80mm	0.08kg
10182	Ø96/100mm	0.14kg

\*Inside/outside pipe diameter

## Duct calibration

### Calibration mandrels

Calibration mandrels are used to check inside duct diameters & prevent any crush. They come along with pulling mandrels & enable a 2 in 1 solution: calibration + rope pulling at the same time.

Calibration mandrel for PVC, TPC, concrete ducts

Calibration mandrels for HDPE ducts

PN	Dimensions*	Inside pipe Ø	Ø center disk	Pipe type	Weight
0410	Ø25/28mm	25mm	22mm	PVC, TPC, concrete	0.04kg
0411	Ø30/33mm	30mm	27mm		0.05kg
0412	Ø42/45mm	41.4mm	38mm		0.14kg
0413	Ø55/60mm	56mm	50mm		0.16kg
0414	Ø75/80mm	75mm	70mm		0.32kg
5069	Ø27/32mm	27mm	24mm	PEHD Tube	0.05kg
1042	Ø33/40mm	32.6mm	28mm		0.05kg
2443	Ø41/50mm	40.8mm	36mm		0.16kg

\*Inside/outside pipe diameter  
Please refer to the recipe booklet to qualify the sizes. Consult us for other sizes.

## Cable blowing trough occupied pipes

### Blowing rope kit trough occupied PVC ducts

Used to blow rope into PVC ducts with cables already deployed. Max distance up to 300m, suitable for ducts of 45mm, 60mm, 80mm.

#### Kit details:

- + 3 set of occupied duct type of pulling mandrels (45mm, 60mm, 80mm)
- + 1 blowing gun to be equipped with end connectors
- + 3 end connectors (45mm, 60mm, 80mm)
- + 1 adaptor for the 45mm end connector assembly

Blowing rope kit trough occupied PVC ducts

PN	Designation	Weight
0738	Blowing rope kit trough occupied PVC ducts	3.74 kg

PN	Designation	Dimensions*	Weight
2518	Blowing mandrel for occupied duct	Ø42/45mm	0.08kg
2519	Blowing mandrel for occupied duct	Ø55/60mm	0.16kg
2520	Blowing mandrel for occupied duct	Ø75/80mm	0.20kg
5216	Blowing gun for occupied ducts	Ø42/45mm	0.78kg

\*Inside/outside pipe diameter

Blowing mandrel for occupied duct

Blowing gun for occupied ducts

## Parachute blowing mandrel

2 in 1 solution to be blown in empty or occupied PVC pipes & HDPE ducts. In addition a swivel installed between the parachute & the rope is strongly recommended to prevent any torsion in the duct & limit any rope jamming knots.

### Parachute blowing mandrel

Highly flexible, designed for rope blowing in telecom pipes. Co-developed with a specialist manufacturer of parachute. The specific raw material used to manufacture these mandrels ensure a very lightweight & flexible structure to go through any obstacle (duct crush, cable). Up to 800m blowing distance.

**Product benefits:**

- + Lightweight & air blowing capacity
- + Suitable for empty or occupied ducts
- + Fully textile material with none rigid component that could become a point of friction & result in a blockage
- + Wide range of use

PN	Designation	Inside pipe Ø	U.V	Weight
37000	Parachute blowing mandrel TED® - Size 1	from 20 to 60mm	Lot of 3	0.001kg
37001	Parachute blowing mandrel TED® - Size 2	from 60 to 150mm	Lot of 2	0.002kg

## Nylon blowing mandrel

Made with a thick nylon structure, they offer a good compromise between rigid & flexible blowing mandrels.

PN	Designation	Weight
90173	Nylon blowing mandrel 19mm	0.01kg
90174	Nylon blowing mandrel 25mm	0.01kg
90345	Nylon blowing mandrel 38mm	0.02kg
90175	Nylon blowing mandrel 51mm	0.04kg
90176	Nylon blowing mandrel 76mm	0.05kg
11239	Nylon blowing mandrel 102mm	0.05kg
11235	Nylon blowing mandrel 127mm	0.06kg
11240	Nylon blowing mandrel 153mm	0.08kg

## Swivels

Essential to avoid any torsion of the cables and ropes while they're being deployed. Installation at the end of the mandrels, they enable to reduce the risk of rope jamming knots

PN	Designation	Weight
0866	Swivels TED® Ø16mm	0.06kg
1055	Swivels TED® Ø18mm	0.07kg
1056	Swivels TED® Ø26mm	0.19kg
1057	Swivels TED® Ø30mm	0.49kg
1058	Swivels TED® Ø36mm	0.74kg

# DRUM HANDLING

## Expert's advice

### How to choose the suitable solution to proceed with telecom cable unwinding

A fiber optic cable is very sensible, it's has to be handled with care to ensure the network quality & prevent any damage to the fiber. It is then very important to choose the dedicated drum handling solution depending of the drum specification & the condition in which it will be used.

#### A WELL-SIZED SOLUTION

If it's undersized or oversized, blockage risks are high. Risks are not only a speed slow down, but it could also generate major tensions on the cable. It's then mandatory to check for each project that the drum dimensions will be compatible with the capacity of the drum roller.

- (A) Height of the drum: For the drum roller, it has to be adapted to the distance between the front & rear rollers. For drum jacks, to their lifting height.
- (B) Width of the drum: Ensures that the roller's width or the length of the bar is well calibrated. It is strongly recommended to keep enough margin so that the drum will not touch the sides.
- (C) The axis hole: In the case of axis unwinding, it has to be compatible with the diameter of the bar which support the drum.

#### A SOLUTION ADAPTED TO THE DRUMS QUALITY

Drum's sides can become fragile and no longer able to support the drum's weight. Solutions with "roller" will then no longer be suitable.

**Caution:** Drums made with metal edge or straps are not compatible with an aluminium roller. Because of the raw material, aluminium rollers will quickly be damaged.

#### A SOLUTION ADAPTED TO THE PURPOSE

When used in a warehouse to unwind cables regarding worksite needs, the solution is fixed in a controlled environment and installed on a flat floor. There is no major limits/risks in this configuration, then most of the solutions are suitable. Therefore, when the unwinding takes place on the worksite, conditions are way more difficult because it's not a controlled environment for the engineers. The floor could be uneven, loose or sloping. It also mandatory then to be able to move the solution along with worksite progress.

#### Backbone, transport, distribution networks

SOLUTION	IN INTERVENTION?
<b>Cable roll-off rails</b>	<b>Yes absolutely</b> This type of roller is quite easy to install & robust. This solution will meet most of the requirements.
<b>Drum jacks</b>	<b>Yes if needed</b> Particularly convenient to compensate grounds levels. Jacks has to be installed on a flat surface, then their use on worksite is not really relevant.
<b>Trailer</b>	<b>Recommended</b> The trailer is ideal for worksite in mobility. The drum is secure on the trailer, to ensure engineer's safety. But, it's quite bulky & heavy, really convenient for big & heavy drums.

#### Customer connection & last mile access

SOLUTION	IN INTERVENTION?
<b>Cable drum roller</b>	<b>Yes absolutely</b> This type of roller is quite easy to install & robust. This solution will meet most of the requirements.
<b>Non hydraulic jacks</b>	<b>Yes if needed</b> Vertical type of jacks enable to deal with a large range of drums. It's more suitable for indoor cable deployment because of the unwinding direction.
<b>Foldable &amp; compact drum roller</b>	<b>Recommended</b> Strongly recommended for customer connection engineers. Hence it's super easy to carry, it enables to save a lot of time. Even if the edge of the drum are damaged, this type of roller using the main axis could still be suitable for a safe use.

## Drum jacks

### Hydraulic & non hydraulic drum jacks

These solutions are a suitable alternative to trailers for difficult outdoor worksite to access, and even more suitable for indoor warehouse cable pre-cut. The independently height-adjustable jacks allow installation surface with different ground levels. In addition to the Drum jacks there is a set of mandatory accessories to ensure a safe use : a support bar + locking ties.

PN	Designation	UV	Weight
10372	Hydraulic drum jacks Ø1100 - 1600mm up to 4T	Pair	32kg
4581	Hydraulic drum jacks Ø800 - 2200mm up to 10T	Pair	106kg
4583	Hydraulic drum jacks Ø800 - 3200mm up to 10T	Pair	126kg
19008	Support bar - Ø51mm Lenght 1500mm + locking ties for hydraulic jacks up to 3T	Pack	16kg
19009	Support bar - Ø76mm Lenght 1850mm + locking ties for hydraulic jacks up to 8T	Pack	42kg
1001179	Non hydraulic drum jacks TED® Ø1100mm - 1700mm up to 1.6T	Pair	13.6kg

## Drum rollers

### Cable roll-off rails

Used in pairs, they adapt to all reel widths.  
All models are equipped with a brake system for easy and safe loading and unloading.

#### Steel cable roll-off rails Ø1650mm

Touret					
PN	Material	Ø max.	Weight max.	UV	Weight
3945	Steel	1650mm	1500kg	Pair	22kg

#### Cable roll-off rails Ø1200mm

Touret					
PN	Material	Ø max.	Weight max.	UV	Weight
1001177	Alu	1200mm	1000kg	Pair	16kg

## Adjustable cable rails for drum up to Ø1.65m

TED® adjustable cable roller rail offers versatility of the drum roller. Equipped with 2 stabilisation bars to unify each roller. This configuration is really handy to keep a parallel position while the drum is positioned on the cable roller & then unwinded. Rollers are set with 3 different positions which ensure a wide range of drums.

### Product benefits:

- + No tools to adjust each roller position
- + One man job (18kg per roller, bar included)
- + Versatile: From 600mm to 1650mm drums diameter
- + Safety: Cable rollers will remain parallel & stable while the drums are loaded & unloaded.

PN	Material	Touret			
		Ø min.-max.	Width max.	Weight max.	Weight
37003	Steel	600-1650mm	1095mm	2500kg	36kg

## Cable drum roller

One-piece drum roller. Sturdy, welded frames. Placed on the ground, they are immediately operational.

### Ø700mm cable drum roller

PN	Ø max.	Touret		
		Width max.	Weight max.	Weight
1000851	700mm	500mm	200kg	9.8kg

### Ø1200mm cable drum roller

PN	Ø mini.-max.	Touret		
		Width max.	Weight max.	Weight
4326	600-1200mm	735mm	1200kg	28kg

## Foldable drum & rope dispenser

Foldable and equipped with wheels, they facilitate reel handling on site and between sites. Suitable for handling drums with damaged flanges.

### Foldable and mobile dispenser for drum & drawrope up to Ø570mm

Particularly practical for deployments in moderately to sparsely populated areas (peri-urban areas and countryside). It saves time during deployments by ensuring the fluidity of the unwinding of the cable, and during travel, all without taking up space in the vehicle.

**Product benefits:**

- + Cost-efficient solution
- + Lightweight & compact
- + Adjustable handle strap

		Touret			
PN	Ø max.	Width max.	Weight max.	Dimensions	Weight
1001382	570mm	440mm	45kg	700x530x50mm	4.2kg

### Expert's advice

#### Drum's storage

After 1<sup>st</sup> use, storage of the drum in a vertical position could either damage the flasque, and/or results un issues while unwinding the cable.

We strongly recommend to proceed with horizontal storage. This position prevent water stagnation on the flasque & unregular deformation.

# Swivels

## Ball swivels

Ball swivels prevent twisting of the deployed elements during the pulling/unwinding phase. Mounted at the rear of the mandrels, they limit the risk of knots when pneumatically switching with the pull string.

PN	Designation	total Ø (B)	Length (A)	Ø fixation (C)	CMU* (daN)	CMR** (daN)	Weight
0866	TED® Ball swivels Ø16mm	16mm	64mm		330	1 000	0.06kg

1058	TED® Ball swivels Ø36mm	36mm	156mm	16.3mm	5000	12000	0.74kg

\* Maximum working load  
\*\*Minimum breaking load

## Shackle

### Straight shackle with bolt

Its smooth bolt facilitates passage through pipes. This shackle is ideal for connecting a pulling needle to a cable puller, for example.

#### Technical specifications:

- + CMU: 260 daN
- + CMR: 400 daN

PN	Designation	Weight
12573	Straight shackle with countersunk screw bolt Ø10mm	0.08kg

## Roller cable guide

### Roller cable guide

Solution to prevent friction damage on the cable prior to get into the duct. Made of galvanized steel with a polyamide roller.

#### Technical specifications:

- + Length: 330mm

PN	Designation	Weight
1059	Roller cable guide Ø25-28mm	0.71kg
1060	Roller cable guide Ø30-33mm	0.77kg
1061	Roller cable guide Ø42-45mm	0.88kg
1062	Roller cable guide Ø55-60mm	0.99kg
1063	Roller cable guide Ø75-80mm	1.82kg

Expert's advice

Cable pulling: How to avoid friction

Often neglected. Cable guides are essential to limit any damage on the cable due to friction prior to be deployed in the ducts. Less friction is also a key to reduce all efforts to pull the cable.

**Straight 1** They make it easier to unwind and advance the cable along the worksite preventing it from ground friction.

**Angles 2** they allow you to negotiate building corners (on the surface) and changes of direction (in trenches).

**3 pulleys 3** or **steerable 4** they prevent abrasion on the edge of the chamber or when lowering into trenches.

Finally, **cable rollers 5** are essential to guide the cable into the conduit and prevent wear caused by the edge of the sheath.

Cable rollers

Triple cable roller

A triple cable roller equipped with 3 rollers designed to be placed at the manhole edge.

Swiveling Edge Roller TED®

Cable laying roller fit for all installations of 80mm cables & ropes in manholes entrance. Running roller made of galvanized steel mounted on shielded ball bearing 360° pivotable. This tool ensures a non-damaging deployment of the cable outer jacket & its content (fibre, copper & aluminium strand).

Corner cable roller

A heavy duty cable roller for pulling the heaviest cables around difficult corners. The unit consists of a heavy duty frame with two vertical and one horizontal steel rollers.

Straight line cable roller TED®

Cable laying ground roller for all underground deployment of Ø135mm cables & ropes. This tool ensures a non-damaging deployment of the cable outer jacket & its content (fibre, copper & aluminium strand). Designed with a robust long-life galvanized steel frame.

PN	Model	Material	Maximum cable diameter	Dimensions	Weight
1068	Triple cable roller	Galvanized steel	120mm	530 x 430 x 230mm	11.8kg
1000852	Swiveling Edge Roller TED®	Galvanized steel	80 mm	300 x 245 x 150mm	5.9kg
1065	Corner cable roller	Galvanized steel	140 mm	600 x 280 x 260mm	10.4kg
1000850	Straight line cable roller TED®	Galvanized steel	135 mm	300 x 240 x 250mm	3.6kg

# Cable drum trailer

## Site uncoiler

Ideal solution for itinerant jobsites.

A range of robust trailers with finishes designed for the field: captive parts, automatic axle locking for drums, lighting on silentblocs and protected to prevent breakage when maneuvering, metal-reinforced jockey wheel as standard\*.

\*from 750kg model upwards

### Product benefits:

- + Full hot-dip galvanizing
- + Suspended axle
- + Quality finishes

PN 2691

## Expert's advice

### What license do you need to tow trailer?

Towing a trailer is all a question of GVW\*! The license class depends on the GVWR of the towing vehicle + trailer\*\*.

\* The GVW or Gross Vehicle Weight Rating represents the total weight that a loaded road vehicle must not exceed. On the vehicle registration document, the GVW is indicated in kilograms in box F.1.  
\*\* The trailer's GVW must be less than or equal to the unladen weight of the towing vehicle.

+ EN 355:2002

PN	Length	Weight
17788	20cm	0.1kg
17789	40cm	0.1kg

## Expert's advice

### The air gap

The air gap is the height required under the telecoms technician (with the use of a fall arrest system) to prevent them from colliding with an obstacle when falling. There are 2 types of air draught:

- Available air gap: this is the distance between the structure on which the telecoms engineer is working at height and the nearest obstacle (ground, balcony, etc.).
- Required air gap: the minimum distance required that, if the telecom engineer falls, he or she will not collide against the nearest obstacle.

#### Air gap calculation:

Length of the lanyard (A) + Tear of the energy absorber (B) + Height of the person (C) + Safety margin imposed by the standard: 1 m (D)

# TEST & MEASUREMENT

## Antenas alignment

### Mobile networks toolkit

**Included:**

- + 2 in 1 optical tester. to deal with VFL/OPM measurements
- + A copper tester to deal with RJ45 cables
- + All VDE tools to deal with active equipment. powered by energy

# TOOL BAG & TOOL CASE

## Trolley, backpacks & cross body bag

### Trolley Tool Case

#### Product benefits:

- + Time-saving: all the tools have a place and are easily accessible
- + Multiple storage compartments for organisation of tools
- + Comfort: large all-terrain wheels
- + Safety: protects your back when transporting

#### Technical specifications:

- + Telescopic handle
- + Storage provided for subscriber boxes
- + Large interior storage compartment with removable central divider
- + 9 exterior storage pockets

PN	Designation	Weight
32079	TED® Trolley Tool Case	5.50kg

Trolley sold empty, without tools

## Trolley Tool Backpack

### Product benefits:

- + Time saving: all the tools have a place and are easily accessible
- + Comfort: transforms into a trolley with a simple telescopic handle extension
- + Practicality: the removable bag allows you to easily access tools

### Technical specifications:

- + Padded straps and back
- + The main pocket can be opened at 90°
- + Removable storage
- + 2 external storage pockets

PN	Designation	Weight
32081	TED® Trolley Backpack	3.25kg

Backpack sold empty, without tools

## TED® Backpack

### Product benefits:

- + Time saving: all the tools have a place and are easily accessible
- + Comfort: padded shoulder straps and handle
- + Practicality: the bottom of the bag is reinforced
- + Completely waterproof, it can be placed anywhere

### Technical specifications:

- + Two carrying handles: one soft and one reinforced
- + Padded back and shoulder straps
- + 2 large interior pockets with around ten locations
- + 1 interior pocket and 1 exterior
- + Additional storage on the sides
- + Openable flap to improve access to bag contents

PN	Designation	Weight
32080	TED® Backpack	2.45kg

Backpack sold empty, without tools

### Optima tool bag

**Product benefits:**

- + Robust and light, practical and comfortable
- + Plenty of storage

PN	Designation	Weight
10841	Optima tool bag	3.08kg

Tool bag sold empty, without tools

### Crossbody tool bag

**Product benefits:**

- + Adjustable shoulder strap allowing the bag to be carried shoulder or waist
- + Lightness thanks to its 100% textile composition
- + Practicality with its multiple compartments and storage pockets storage

PN	Designation	Weight
13814	Crossbody tool bag	0.57kg

Tool bag sold empty, without tools

## Tool belt

Multi-purpose solution. With numerous storage pockets and a ring for sledgehammer and hammer. This ergonomic belt provides maximum comfort for mobile technicians.

### Product benefits:

- + Versatile and adjustable
- + Durable
- + Comfortable and durable

# FIBER OPTIC CABLES PREPARATION TOOLS

## Riser cables

### Riser Cable Stripper

#### Product benefits:

- + Lightweight, compact and easy to handle
- + Easy to use: no adjustments required and intuitive intuitive handling

PN	Designation	Weight
34001	TED® Riser Cable Stripper	0.06kg
34002	Spare blades for riser cable - 25 units	0.03kg

### Cable Slitter Ø5.8 - 12mm

#### Product benefits:

- + Increased safety: efficient work with no visible blade blade
- + Increased productivity: fast, perfect cable preparation without risk of damaging inner modules
- + Fits in your pocket: an ideal replacement for the kabifix and electrician's knife.
- + Wide range of uses

PN	Designation	Weight
34005	TED® Cable Slitter Ø5.8 - 12 mm	0.15kg
34006	Spare blade kit for TED® cable slitter	0.32kg

## Expert's advice

### How to choose the right tools without a visible blade?

Technological advances have allowed many hand tools manufacturers to create bladeless solutions. Aiming to represent alternatives to knife, all these tools do not have necessarily the same efficiency or ergonomics. To avoid using solutions that do not correspond to standards desired by the telecoms engineer, non visible blade tool must be designed according to four criteria :

#### SIMPLICITY

To replace the use of the knife and the cutter, a good tool without a visible blade must be easy to use. The simplicity can also be linked to the playful aspect of the solution which will be able to convince its users even more easily.

#### SPEED

In a current context where the number of worksites is not proportional to the workforce made available, the speed of execution of the telecom technician is essential. The tool without a visible blade must therefore save time considerably in business: for the training of a beginner or for an experienced technician who may have difficulty in accepting a new tool (relearning for example).

#### EFFICIENCY

Ideally, the solution without a visible blade must allow work as effective as the knife or the cutter. The opening of optical fiber or copper telecom cables must be of quality for that the technician can act precisely.

#### SECURITY

Each tool without a visible blade must be designed for the engineer's safety. Ergonomic to reduce in first-time musculoskeletal disorders, the blade is hidden to, in a second time, avoid cuts even when carrying it in the trouser pocket. The engineer must never come into direct contact with the blade: incorrect manipulations are thus circumvented, leaving room for comfort and practicality of use.

Tools with no visible blade are revolutionising the working methods of telecom engineers for opening copper and fibre optic cables. Despite certain situations not being adapted to a particular tool, this type of inconvenience should not call into question many interventions that go smoothly. On the contrary, it must allow Safety services to trigger a risk analysis for the engineer with the appropriate tool as a solution.

## Fibre optics preparation

### Optical fiber cable stripper

The stripping pliers enable a circular cut of the micro sheats & loose tube. In order to easily strip the fiber without damaging it. The head is fitted with a spring that provides equal tension throughout the operation.

These pliers are suitable to perform round cuts with diameters ranging from 1.2mm to 6mm. Non-adjustable. They save time and are ideal for novice for novice engineers.

These pliers are versatile. They can be used to perform round and longitudinal cuts, as well as windows on micromodules. Hence they're adjustable these pliers are more suitable for experienced engineers.

## FIBER OPTIC CABLES PREPARATION TOOLS

### Fiber optic stripper

The optical fibre, whether in the cable or in the jumper, is protected first by a primary coating, with a tight structure on the glass, and then by several tubes or sheaths. At each stage of network organization or maintenance, appropriate stripping tools are needed to remove the various layers, without damaging the silica, in order to preserve its optical performance.

16750	Spare blades for distribution cable stripper Ø2.9 - 6.8mm - 2 units	0.03kg

# FUSION SPLICER

## Active clad alignment Optical fusion splicer Splice 1 & Cleaver Cliv 1

TED® Splice 1 is a 3 axis active alignment fusion splicer. Ideal for last miles customer connection. Super intuitive & easy to use, robust and efficient it's a great cost-efficient solution.

### Product benefits:

- + Splicing time: 6sec
- + Heating time: 12 s
- + Special neck strap for working at height
- + 3 years warranty
- + User friendly interface with a large LCD 4.3" screen
- + Electrodes life cycle

### Package contents:

- + TED® Splice 1 fusion splicer
- + TED® Cliv 1 Fiber cleaver
- + Robust carry case
- + 522 mAh Power supply
- + 230V AC power supply
- + One set of spare electrodes
- + Neck strap

PN	Designation	Weight (pack)
1001164	Fusion splicer & Cleaver pack TED® - Splice 1	6kg

Core alignment

Core alignment fusion splicer TED®

Product benefits:

- + Low splicing loss (SM 0,01dB , MM 0,01dB)
- + Core alignment
- + 2 seconds boot & warm up
- + User friendly
- + Special neck strap for working at height
- + 3 years warranty
- + Easy-to-use interface and color touchscreen
- + Drop-proof up to 76cm
- + Electrode life: approx. 5000 arcs

Technical specifications:

- + Save your time: 6 sec splicing time (SM AUTO)
- + 500 splices & heat cycles
- + Robust & reliable with rubber protectors
- + Large 5 inch screen full touch with tempered glass
- + x500 magnification and 180° tilting monitor
- + LED lights

PN	Designation	Weight
1002010	Fusion splicer & cleaver pack TED® Splice core	9.1kg

## Cleaver TED®

### Optical fiber cleaver TED® CLIV 1

TED®

TED® Cliv 1 is a robust & stable fiber optic cleaver. It's auto-push back system enables a 2 step cutting solution compatible with most type of fiber. Equipped with a long life 24 positions blade up to 50 000 cuts with a high capacity fiber collector.

#### Product benefits:

- + 24-position cutting blade
- + Cutting angle: 0.5
- + Long blade life up to 50 000 cuts
- + High-capacity fiber collector

PN	Designation	Weight
1001530	Cleaver TED® CLIV 1	0.250kg

## Accessories for TED® fusion splicer

PN	Designation	Weight
1001531	Cleaver's blade TED® Cliv 1	0.01kg
1001532	Pair of electrodes TED® Splice 1	0.01kg
1001533	Neck strap TED® Splice 1	0.01kg
1001534	Batterie TED® Splice 1	0.150kg
1001535	Power supply TED® Splice 1	0.100kg
1001536	Carry case TED® Splice 1	2kg

## Accessories for Sumitomo fusion splicer

### Blade for cleaver FC-6R. FC-7R. FC-8R

Particularly durable, it can perform around 60,000 cuts in 24 positions (depending on use).

PN	Designation	Weight
20002	Blade for Sumitomo cleaver FC-6R. FC-7R. FC-8R	0.040kg

### Electrodes for splicers T25e. 39. 55. 57. 66. 71. 72. 400S

Estimated durability up to 6000 splices (electrode life varies according to conditions of use). Sold in pairs.

PN	Designation	Weight
4278	Electrodes for Sumitomo splicers T25e/39/55/57/66/71/72/400S Pair	0.010kg

### Expert's advice

#### How to proceed with an optical fusion splicer?

An optical fusion splicer is a mandatory equipment for a fiber engineer. This machine enables to align fiber prior to splicing in order that light can travel from one fiber core to another with the minimum splice loss in between. To limit the splice loss, we share some advices below:

##### STEP 1: GET YOUR EQUIPMENT READY

All key tools : a fusion splicer, a fiber optic stripper, some wipes, isopropyl alcohol & splice protectors (mechanical or shrinkable).  
Make sure that prior you begin with the process, all your tools have carefully cleaned to limit contamination that will result in fiber loss.

##### STEP 2: SELECT THE CONVINIANT SPLICING PROGRAM

Choose the correct program regarding the type of fiber that you're dealing with (single mode, multi mode).

*Expert's advice:* We strongly recommend to choose: SM auto: single mode MM auto: multi mode.

##### STEP 3: STRIP & CLEAN THE FIBER

Strip the fiber on 3 to 4 cm length. Clean this stripped zone with a wipe impregnated with isopropyl alcohol up to "swipe" noise.

##### STEP 4: CLEAVE THE FIBER

Place the fiber into the fiber cleaver, on the correct position.

*Expert's advice:* Make sur that the stripped area is well position into to the fiber holder

##### STEP 5: PLACE THE FIBER INTO THE FUSION SPLICER FIBER HOLDER

Insert the fiber between the v-groove slot & the electrodes, then close the fusion splicer top cover.

*Expert's advice:* While your proceed with the fiber insertion, avoid any choc to the fiber or you will need to repeat the cleaving cycle

**Prior to set the splicing process, you have to repeat cycle 3, 4, 5 for the 2<sup>nd</sup> fiber.**

##### STEP 6: PROCEED WITH THE SPLICING PROCESS

To launch the process, close the top cover. If the auto launch is set the splicing will proceed immediatly.

##### STEP 7: CHECK THE SPLICE QUALITY

3 criteria are used to check the splice quality

- Image quality of the spliced fiber : Correct core alignment, no dust or air bubble
- Estimated loss calculated by the splicer
- Splice tensile strenght resistance test

##### STEP 8: INSERT THE SHRINKABLE SPLICE PROTECTOR & PROCEED WITH THE HEATING PROCESS

Prior to open the fusion splicer's cover, bring the splice protector close to the stripped aera where the splice has been done. The splice protector as to cover this whole aera. One it has been correctly insert, place it into the the heater & launch the heating process.

##### STEP 9: STORAGE OF THE SHRINKED SPLICE PROTECTOR INTO THE SPLICE TRAY

One the heating process is done, place the splice protector on the cooling plate. One T° has been cooled, place it the splice tray & proceed with the fiber storage.

## Smooovite

TED<sup>®</sup>

The Smooovite by TED<sup>®</sup> is a real innovation for telecom engineers. It is used to thread the sleeves on the fibre quickly and easily. The tank can hold up to 15 splice protection sleeves with lengths of 40 to 60mm.

Smooovite is a real-time saver. Engineering teams no longer must worry about a lack of precision caused by the cold, a vision problem or other. The Smooovite now allows you to perfectly align the splice protection sleeves to the fibre optic. This innovation also protects engineers: the manipulation between the optical fibre and the splice protection being simplified, the engineer no longer risks sinking a piece of fibre in the hand.

### Product benefits:

- + Timesaving: The conical shape allows directing quickly the optical fibre in the splice protection
- + Compact: 7cm long

### Technical specifications:

- + Capacity: 15 splice protection sleeves
- + Length of the splice protection sleeves: 40 to 60mm
- + The reservoir holds the equivalent of a cassette
- + Optimised for Ø2.4 and 2.2mm splice protection

PN	Designation	Weight
34000	Smooovite by TED <sup>®</sup>	0.06kg

“ Engineers on the street are pushed to do 200 to 300 splices per day, repeating the same gesture! There can quickly be a loss of time due to a lack of precision linked to a problem of sight, to the cold environment or other difficulties. The Smooovite by TED<sup>®</sup> allows to insert up to 15 splice protection sleeves in a conical tank. Thus, it is easier to align them in front of fibre optic strands requiring soldering.

Gilles BOONE, electrician for 20 years, inventor of the smooovite easy to align

## Splice protectors

### Smooves

**Product benefits:**

- + Clean, high-quality work
- + Good shrinkage control
- + Does not bubble in the oven when used according to your welder's manual

**Technical specifications:**

- + Color: Transparent
- + Minimum processing temperature: 110°C

We recommend 2.4mm smoooves compatible with Corning, Commscope and Telenco®.

# JOINTERS TENT

Tent & umbrella

## Jinters tent

TED® by Trigano site tents are the successful result of a collaboration between Trigano and Telenco, combining over 40 years' know-how in camping tents with the expertise of a telecoms specialist.

**TED**<sup>®</sup>  
by **TRIGANO**

Tents are used by technicians to protect themselves and their equipment from rain, snow, wind and sun. The materials used in our tents have been carefully tested to guarantee ease of installation and durability.

Detailed specifications of our tents at [www.telenco-store.com](http://www.telenco-store.com)

## 2 in 1 Tent & umbrella - Orange

### Product benefits:

- + Easy opening system
- + Cost efficient solution to protect your engineers and their valuable equipment's (OTDR, Splicing machine) from weather (rain, sun, dust)
- + Protective side cover easy to assemble & remove with a zip system
- + White polyester to provide natural light
- + Self-reflective 25mm band + high-visibility orange colour offers additional security for the engineer's safety
- + 6 inners pockets to store and organise your tools & consumables
- + Custom flocking available to develop your corporate Identity

### Technical specifications:

- + Dimensions: 170 x 170cm
- + Cover's Materials: polyurethane-coated Oxford polyester
- + Water penetration resistance: 3000mm
- + Lightweight 210D material's density

 Flocking service available\*

PN	Designation	Weight
35004	High-visibility orange tent umbrella	4.4kg
20105	Round weighted parasol stand, black concrete with adapter	14kg

### Expert's advice

#### Ballast bags

Remember to include ballast bags with your tents to guarantee their stability!

## 5' pop-up worksite tent

### Product benefits:

- + Pop-up opening system thanks to its interior fiberglass poles which enable a record-breaking time installation. For starting to enjoy the benefits of this worksite tent without further delay.
- + Access at the front side via a wide opening with zip fastening
- + Made of Oxford polyester fabric (210D PU waterproof 3000 mm) white/yellow that ensures a natural lightening
- + The 25 mm wide retro-reflective strips that separate the white fabric from the yellow one all around the tent offer it a better visibility/protection
- + Steel pegs ensure an additional fixing in case of bad weather (wind, heavy rain etc.)
- + Two steel masts offer the possibility to create an awning

### Technical specifications:

- + Tent dimensions: 190 x 190 x 200cm
- + Storage bag dimensions: Ø78 x 7cm
- + Roof, walls and rain fly: polyurethane-coated Oxford polyurethane (210D PU imper 3000mm)
- + Frame: 4 fiberglass poles Ø5mm
- + 6 tent cords / 22 steel pegs / 2 steel poles steel poles (awning)

PN	Designation	Weight
12129	5' pop-up worksite tent yellow	6.5kg
35008	5' pop-up worksite tent orange	6.5kg

### Expert's advice

#### Ballast bags

Remember to include ballast bags with your tents to guarantee their stability!

**Optima jointers tent TED® by Trigano**

**Product benefits:**

- + Total protection against rain, cold, wind and sun
- + Made of robust, premium-quality materials
- + Two side vents allow better air circulation
- + Retro-reflective strips and high visibility bands allow better visibility/safety of engineers during day or night interventions
- + The tent is ready for use in seconds: quick set-up/ dismantling by one person
- + The partial rear opening of the tent makes it easy to pass through cables & closures
- + Compact carry bag vehicles storage
- + The cleaning of the tent can be carried out by washing with high pressure water
- + The skirt allows both weather protection and an additional ballast base

**Technical specifications:**

- + Tent dimensions: 180 x 180 x 190cm
- + Carry bag dimensions: 140 x 27 x 27cm
- + 210D oxford top fabric with PVC coating
- + M2\* -UV treatment (UV30+)
- + Frame: 12.5mm diameter fiberglasspoles

\*M2 Laminated PVC Bottom Canvas/Tarpaulin - UV Treatment

PN	Designation	Weight
2010	Optima jointers tent TED® by Trigano	21kg

**Expert's advice**

**Ballast bags**

Remember to include ballast bags with your tents to guarantee their stability!

# FIBER OPTIC DECONTAMINATION

## Dry cleaning

### TED® Ferrule Cleaning Pen

Dedicated tool for dry cleaning of optical ferrules & adaptors, connectors, pigtailed, patch cord. Extendable tip to allow cleaning on already installed adaptors in patch panel.

#### Product benefits:

- + Extendable end for easy drawer access high density
- + Effective against dust and oil

#### Technical specifications:

- + Fits 2.5mm ferrules: SC/FC/ST
- + Up to 600 cleaning cycles

PN	Model	UV
34004	2.5mm	Unit
19546	1.25mm	Unit

### TED® cleaning swab

Cleaning rods can be used with isopropyl alcohol or degreasers.

PN: 30064

PN: 30065

PN	Application(s)	UV	Weight
30064	1.25mm ferrules (LC/MU)	50	0.040kg
30065	2.5mm ferrules (SC. ST. PC)	50	0.040kg

### Alcohol dispensers

PN: 11274

PN: 7013

PN	Model	Weight
11274	Stainless steel pump - 120ml	0.063kg
7013	240ml	0.049kg

### Dry wipes

Non-linting dry wipes are used for all optical fiber cleaning applications.

PN: 5982

PN: 4794

PN: 4803

PN	Model	UV	Weight
5982	FiberKleen™	Box of 50	0.05kg
4794	CleanWipes	Box of 90	0.07kg
4803	KimWipes	Box of 280	0.16kg

### Cable & Fiber Decontamination Kit

This kit contains everything you need to ensure complete, fast and efficient cleaning of fiber optic networks.

**Technical specifications:**

**Kit contents:**

- + TED® tool bag with shoulder strap
- + 1L isopropyl alcohol bottle
- + 240ml alcohol dispenser bottle
- + Electro-Wash ES810E spray degreaser
- + Box of 280 dry wipes for FO cleaning Kimwipes EXL

**Product benefits:**

- + Compact
- + All-inclusive package

PN	Designation	UV
18397	Cable & Fiber Decontamination Kit	Unit

### Fusion splicer Maintenance Kit

This kit contains all you need to maintain your fusion splicer.

**Technical specifications:**

**Kit contents:**

- + TED® tool bag with shoulder strap
- + 240ml alcohol dispenser bottle
- + Box of 50 TED® cleaning swabs for camera & v-groove
- + Box of 50 TED® cleaning swabs for splicer holders
- + Precision tweezers, 45° angle 155mm
- + Flat brush 25mm
- + Dusting blow bulb

**Product benefits:**

- + Compact
- + All-inclusive package

PN	Designation	UV
1001917	Fusion splicer Maintenance Kit	Unit

### MTP/MPO cleaning pen

This pen can be used to clean optical surfaces, either directly or through a connector.

**Technical specifications:**

- + Suitable for MTP and MPO connectors
- + Up to 600 cleanings

**Product benefits:**

- + Easy to use
- + Fast, reliable cleaning: just 1 click
- + Robust and durable

PN	Designation	Weight
16439	MTP/MPO cleaning pen	0.12kg

### CLEANSSETTE cleaning cassette

PN: 14226

PN: 14227

The cleaning cassette enables dry decontamination of all simplex connectors.

**Technical specifications:**

- + Up to 420 cleaning cycles
- + Antistatic
- + Connections: SC, LC, FC, MU, MT, ST, MPO

**Product benefits:**

- + Compact
- + Ergonomic: one-handed operation

PN	Designation	Weight
14226	Cleanssette cleaning cassette	0.15kg
14227	Refill for CLEANSSETTE cassette	0.05kg

## How to clean all optical connection points?

### WHAT ARE THE DIFFERENT TYPES OF FIBER OPTIC CONTAMINATION?

Contamination of the optical fibre, regardless of its origin can lead to an active equipment system failure. A single particle, even a microscopic one, can cause a major attenuation of optical connections.

**There are different types of contamination that can affect the end of a connector:**

- Dry contamination: dust,
- Liquid contamination: mineral oils, sebum from hands, gel, resin, grease on cables...
- Contamination with alcohol residue, in particular isopropyl alcohol, which is supposed to clean the fiber, could also contaminate it if too much is used.

Several methods for optical fiber cleaning are available, but requires the correct tools to be carried out.

### WET & DRY CLEANING METHOD

This combo method is an easy & efficient solution to clean optical fiber & connectors.

Left side image represent an optical fiber connector taken with a microscope. It's clearly saturated with dust related to its manipulation. It has to be clean to ensure a limited loss & good signal quality.

Below, an introduction to each step of the Wet & Dry optical fiber cleaning method. We will consider a dry contamination.

#### 1<sup>st</sup> step: Begin with the wet cleaning method of the optical fiber connector

We strongly recommend to begin with a wet cleaning solution. Few options available:

- A water based solution in order to limit the risk for telecommunication engineer's safety related to alcohol use.
- Some isopropyl alcohol
- Use a cleaning pen adapted to the ferrule type (1.25 or 2.5mm, or MPO)
- Non xxx cleaning wipes already impregnated with alcohol or not to use the previous suggested option.
- Telecommunication engineers will only need to impregnate the wipes and to swipe the connector in a one time action. Please, avoid multiple actions hence it could bring more dust.

#### 2<sup>nd</sup> step: Inspection of the connector's ferrule

2<sup>nd</sup> step is the connector's ferrule inspection thanks to an optical fiber microscope. This tool will help the engineers to make sure that a maximum of dusts & other contamination has been removed. Or if an extra cleaning cycle is required. Please clean the microscope adapter after each use to prevent more contamination.

#### 3<sup>rd</sup> step: Dry cleaning

To proceed with this last step, please use a dry cleaning pen.

- Dry connector cleaning pen has to be inserted into the connector to reach the ferrule. Once the ferrule has been reached, press the cleaning pen up to the "click" to connect the cleaning tip with the full ferrule surface.

This last step will ensure that all liquids have been removed from the ferrule. We strongly recommend to do a microscope check & repeat a dry cleaning cycle if it's required.

# COPPER CABLES PREPARATION TOOLS

## Toolkits

### Last mile access

#### Central bag and copper terminal line

Bag designed for copper exchanges and terminal line connections. This set of tools combines classics such as the wrapper/unwrapper with the latest innovations from TED® and KNIPEX®.

PN	Designation	Weight
34010	TED® crossbody equipped bag for last mile access	2.73kg

### Distribution & backbone networks

#### Copper local loop trolley

Suitcase designed for copper transmission and distribution networks. The selected tools cover a wide range of applications and are easy to transport thanks to the TED® all-terrain trolley.

PN	Designation	Weight
34011	TED® trolley bag for copper distribution & backbone networks	26kg

Find out more about the composition of our toolkits on [www.telenco-store.com](http://www.telenco-store.com)

## Cable cutters

## Nippers & diagonal cutters

### Ergonomic cutting pliers

TED®

**Product benefits:**

- + Ergonomic: the angle between the beak and temples means you can work without straining your wrist (less risk of RSI)
- + Greater comfort: bi-material elastomer temples
- + Longer life: chrome-plated finish and induction-hardened cutting edges

PN	Length	●	●	Branches	Weight
32076	180mm	2.7mm	2.3mm	Bi-material	0.27kg

### Side Cutting Pliers

TED®

PN	Length	Branches	Weight
31028	110mm	PVC sheathing	0.06kg

### Expert's advice

#### Choose the right pliers to reduce Musculoskeletal Disorders

Repeated cuts are frequently a source of MSDs of the wrist. In fact, when cutting, the pliers exert pressure on the fingers. The more the support surface is restricted, the more traumatic the pressure will be for the fingers. This is why we advise you:

- To favour bi-material temples over temples with thin PVC
- To adapt the type and size of the grip to the material that needs to be cut

## Ergonomic Straight Half-Round Pliers

**TED®**

**Product benefits:**

- + Ergonomic: the angle between the nose and the grip allows you to work in sparing the wrist (less risk of MSDs)
- + More comfort: bi-material elastomer temples
- + Extended life: chrome finish and induction-hardened cutting edges

PN	Length	○	●	Branches	Weight
31027	180mm	2.7mm	2.3mm	Bi-material	0.23kg

## Pliers

### Ergonomic Straight Half-Round Pliers

**TED®**

**Product benefits:**

- + Ergonomic: the angle between the nose and the grip allows you to work in sparing the wrist (less risk of MSDs)
- + More comfort: bi-material elastomer temples
- + Extended life: chrome finish and induction-hardened cutting edges

PN	Length	○	●	Branches	Weight
32077	200mm	2mm	1.4mm	Bi-material	0.29kg

## HAND TOOLS

### Water Pump Pliers with Overlapping Branches

## Various keys

### Technical plier set

TED®

#### Product benefits:

- + Enables access to building services areas
- + Enables access to multiple type of enclosures & street cabinets (copper, fiber)

PN	Designation	Weight
0950	4 in 1 technical plier set	0.21kg

### Wrench Adjustable

TED®

PN	Length	Weight
1000504	105mm	0.14kg
1000505	200mm	0.25kg
1000507	250mm	0.43kg
1000517	300mm	0.71kg
1000518	375mm	1.50kg

## Pipe wrench

The open-end pipe wrench provides in-depth access to nuts, even on long threaded rods. The 12-sided design allows a smaller angle of recovery, so you don't get stuck when tightening or loosening.

### Set of angled socket wrench spanners

TED®

#### Set composition:

- + Set of 5 wrenches: Ø8 - 10 - 12 - 13 - 17mm
- + Set of 11 wrenches : Ø8 - 10 - 11 - 12 - 13 - 14 - 16 - 17 - 18 - 19mm

PN	Designation	Weight
32070	Set of 5 angled socket wrench spanners Ø8-17mm	0.60kg
3585	Set of 10 angled socket wrenches 6x12 flats Ø8 to 19mm	2.23kg

## Head lamp & projectors

The concept of a headlamp, with or without a rear housing, is now a matter of course in our business. By freeing up the hands of technicians, any activity can be carried out thanks to a beam of light that is always aimed in the direction of vision. The headlamp is a factor of efficiency and safety in the workplace. That's why we're constantly expanding our range of innovative, high-quality products that make work more comfortable.

### Headlamp by SCANGRIP® 140 lumens

**Product benefits:**

- + Dimmer switch
- + Swivel head

**Technical specifications:**

- + Power: 140 lumens
- + Power supply: 2 AAA/LR03 1.5 V batteries (not included)
- + CE certified
- + Tightness: IP30

PN	Designation	Weight
35003	TED® Headlamp by SCANGRIP® 140 lumens	0.04kg

### 1500 lumen compact projector with TED®

**Product benefits:**

- + Magnetic mounting in and/or on a tripod
- + Spotlight with intensity control to adjust the battery life
- + Excellent value for money

**Technical specifications:**

- + Output: 250 to 1500 lumens
- + Dual mounting system: magnetic and tripod for proximity and area lighting

PN	Designation	Weight
1001433	1500lm compact magnetic projector with dimmer switch - TED®	0.58kg
1001434	TED® spotlight mounting accessory for 2m SCANGRIP® tripods	-
1001249	0.9 to 2m tripod for SCANGRIP®/TED® projectors	2.5kg

## Sledge hammers

## Stripping pliers

### Crowbar TED®

PN	Designation	Weight
1000514	TED® Crowbar - 600mm	1.3kg
1000515	TED® Crowbar - 800mm	1.8kg

## Heel Point Crowbar

### Heel Point Crowbar TED®

PN	Designation	Weight
1000511	TED® Heel Point Crowbar - 1.5m length	8.30kg
1000512	TED® Heel Point Crowbar - 2m length	13kg
1000513	TED® Heel Point Crowbar - 2.5m length	17kg

## Glue gun & glue sticks

### Professional glue gun 18-200W

**TED®**

This high-temperature gun (195°C) uses 11/12mm-diameter glue sticks. It's an efficient glue gun, especially for interior work. With a short heat-up time of two minutes, it's quickly ready for gluing operations on a wide range of materials, such as wood, plastic, glass and others, using glue sticks.

**Product benefits:**

- + Professional bonding
- + Precision nozzle
- + Ergonomic handle
- + Easy-to-handle trigger for consistent glue production
- + Reliable and durable

PN	Designation	Weight
32071	Professional glue gun 18-200W	0.64kg

### Transparent glue sticks

**TED®**

Versatile TED® transparent glue stick. Works with electric glue guns.

PN	Glue stick dimensions	UV	Weight
0508	Ø12mm x 20cm	Bag	1kg

# TOOLKITS

## Toolkits

### Fibre Splicers

Meticulously designed to meet the demands of modern telecommunication installations, ensuring reliable and efficient network connectivity. Whether you're a seasoned professional or a beginner in the field, this comprehensive kit equips you with the essential tools and equipment to achieve precise and high-quality fibre splicing results.

#### Fibre Splicer's Toolkit

PN	Designation
PN	Fibre Splicer's Toolkit TED® Backpack
PN	Fibre Splicer's Toolkit TED® Tool Bag
PN	Fibre Splicer's Toolkit TED® Trolley Backpack

#### TED® Fibre Splicer's Toolkit Customer Connexion

PN	Designation
PN	Fibre Splicer's Toolkit - Customer Connection TED® Backpack
PN	Fibre Splicer's Toolkit - Customer Connection TED® Trolley Backpack
PN	Fibre Splicer's Toolkit - Customer Connection TED® Crossbody Bag

### Fibre Jointers

The toolkit includes various essential tools and instruments that aid in preparing, splicing, and testing fibre optic cables.

#### Fibre Jointer's Toolkit

PN	Designation
PN	Fibre Jointer's Toolkit TED® Trolley Bag
PN	Fibre Jointer's Toolkit TED® Tool Bag
PN	Fibre Jointer's Toolkit TED® Backpack
PN	Fibre Jointer's Toolkit TED® Trolley Backpack

### Copper Jointers

This specialised collection of tools and equipment is designed for professionals who work with copper cables.

#### Copper Jointer's Toolkit

PN	Designation
PN	Copper Jointer's Toolkit TED® Trolley Bag
PN	Copper Jointer's Toolkit TED® Tool Bag

# CABLE LABELING & IDENTIFICATION

## Label printers

### M210 labeller + label pack

#### Technical specifications:

- + Easy to use
- + QWERTY keyboard
- + Large display
- + Keyboard shortcuts
- + Print preview
- + Power supply: 6 AAA batteries (not included)

PN	Designation	Weight
20379	Pack BRADY M210 labeller + 10 boxes B-427 38.10mm B/W transparent labels	1.64kg
20380	Pack BRADY M210 labeller + 10 boxes B-499 19.05mm B/W labels	1.52kg
19364	Pack BRADY M210 labeller + 10 boxes of B-499 12.70mm B/W labels	1.02kg
19365	Pack BRADY labeller M210 + 5 boxes B-499 19.05mm B/W + 5 boxes B-427 38mm B/W-T	

## Identify each cable or component

### M210

- Easy to use and transport
- Ready-to-use cartridges
- Label widths from 6 to 19.05mm
- 9 materials - 70 part numbers

### M610

- High-quality 300 dpi printing
- Connectivity: USB 2.0 and wifi (optional)
- Automatic label calibration with Smart Cell technology
- Pre-cut labels and continuous strips up to 50.8mm wide

With the support and expertise of Brady, Telenco is able to offer complete solutions for the printing and identification of Telecom Datacom cables.

# Wall plug for cable tie

## M7 screw-on base

TED®

For quick fastening of cables, pipes and sheaths using clamps maximum width 9mm. Fixing with a screw-in dowel or TF 5mm screws.

PN	UV	Weight
0385	100	0.16kg

## Dowel base

TED®

For quick fastening of cables, pipes and sheaths using clamps maximum width 9mm.

### Technical specifications:

- + UV-resistant
- + Hole diameter: 8mm

# CABLE PULLING

## Tapes

### Crepe paper

Thermal insulation used to wrap splices before heat-shrinking, shrinking the heat-shrink sleeves.

**Technical specifications:**

+ Weight: 72 g

PN	Dimensions	Weight
0371	7m x 70mm	0.1kg

### Tanned tape

It enables bundles to be shrunk onto telephone cables. It is particularly useful for making joints.

**Technical specifications:**

+ Material: non-adhesive PVC

PN	Dimensions	Weight
0558	50m x 40mm	0.52kg
0559	50m x 70mm	1.36kg

### Green anti-corrosion grease strip

Cold-applied greasy green tape without primer. external anti-corrosion protection of buried or insulated buried or insulated networks. Sealing tape for temporary protection temporary protection of cable splices.

PN	Dimensions	Weight
0556	10m x 50mm	0.72kg
0557	10m x 100mm	1.47kg

### Reinforced adhesive tape

Tape used for longitudinal and transverse fiberglass reinforcement. and transverse reinforcement. Secures PVC pipes in telecom civil engineering civil engineering trenches. Bundling.

**Technical specifications:**

+ Material: reinforced polypropylene

PN	Dimensions	Weight
0872	50m x 25mm x 145µm	0.19kg
1797	50m x 50mm x 145µm	0.37kg

### SCOTCH 23T adhesive tape

Scotch Tape 23T is an EPR (ethylene-propylene elastomer) electrical insulating tape. Self-welding, cold-applied. Suitable for low, medium and high-voltage applications.

PN	Dimensions	Weight
0857	7m x 25mm	0.22kg

### Aluminium tape

Tape consisting of a smooth aluminum foil coated with a transparent acrylic adhesive. For indoor and outdoor use.

**Technical specifications:**

+ Non-flammable

PN	Dimensions	Weight
0591	50m x 50mm	0.22kg

## Self-amalgamating tape

Designed for splicing and repairing a wide range of electrical cables up to 46kV. It seals polyethylene sheaths for buried and overhead telephone cables.

PN	Dimensions	Weight
0431	10m x 25mm x 0.5mm	0.13kg
7990	10m x 50mm x 0.5mm	0.38kg

## TP tape

Outdoor use: marking, signage, fixing and repair.

### Technical specifications:

+ Material: PVC

PN	Dimensions	Weight
1928	33m x 48mm	0.304kg

## Insulating tape

This self-adhesive PVC tape is used for insulating and identifying power and telecom cables, and for shrinking cables.

### Product benefits:

- + Excellent elongation
- + Tears easily without special tools

PN	Dimensions	Color	UV	Weight
0488	10m x 15mm			0.3kg
0432	20m x 19mm		10	0.92kg

# Ropes

**Product benefits:**

- + Rot-proof, can be left standing in sheaths
- + UV: stabilized

## PP ropes

Twine for tube and pipe routing. Versatile and economical, it is compatible with our wire guides and can be blown into pipes. Its friction-sensitive nature limits its re-use.

## Braided switch wire

Fine braided yarn with a smooth texture, available in lengths up to 2500m. Made from polyester, its elongation provides good shock absorption. It can be blown and reused for multiple runs.

## Monofilament

Extremely robust, reusable switch wire. Made from polyamide, it offers the best shock absorption and longest service life in the range. This smooth switch wire can be blown into pipes.

## Pulling lubricants

### NB silicone lubricant with microbeads

**TED<sup>®</sup>**

PN: 7336

Liquid lubricant with silicone and microbeads

**Product benefits:**

- + Exceptional lubricating properties over time
- + For long-distance pulling, blowing and carrying
- + Retains its lubricating properties even in the presence of water in the pipes

PN	UV	Weight
7336	19L bucket	19kg

### F lubricant

**Polywater<sup>®</sup>**  
Solutions at work.

PN: 4111

PN: 2695

Clean, slow-drying, water-based lubricating gel. Reduces tensile stress when pulling cables. Particularly suitable for D1/D2 fiber optic cable pulls.

PN	UV	Weight
4111	Can 3.8L	3.82kg
2695	19L bucket	19.502kg

### J lubricant

**Polywater<sup>®</sup>**  
Solutions at work.

PN: 4112

PN: 7444

PN: 2095

Slow-drying, water-based lubricating gel. Suitable for long-distance deployments. Non-flammable. Particularly suitable for fiber optics.

PN	UV	Weight
4112	1L bottle	0.946kg
7444	3.8L bucket	3.96kg
2095	19L bucket	18.837kg

### Expert's advice

#### Understanding EN 388 standard

EN 388 consists of 5 to 6 notes:

- Abrasion resistance: **from 1 to 4**
- Slicing cut resistance (old notation): **from 1 to 5**
- Tear resistance: **from 1 to 4**
- Puncture resistance: **from 1 to 4**
- Cut resistance TDM (new notation): **from A to F**
- Impact resistance (optional): **P**

EN 388  
3.1.2.2.X

### Choosing the right glove size

Place your right hand on the **green** mark between your thumb and forefinger as shown in the diagram.  
Read your height on the right side of your hand.

## Cleannings

TED® white cotton hand towels

TED®

PN	Dimensions	UV	Weight
1000149	19.4 x 28cm	Lot of 2	1.96kg

### Multifunctional cleaning wipes

TED®

TED® multi-purpose cleaning wipes: clean and degrease hands. Removes grease, oil, hydrocarbons, sludge, tar, dirt, putty, glue, paint, etc. They have a scrubbing side to remove stubborn dirt and a soft side for wiping and finishing.

**Product benefits:**

- + Ready-to-use and disposable
- + Soap-free
- + No rinse / no residue
- + Orange fragrance

# ESSENTIAL TESTERS

## Visual fault locator

### Visual fault locator TED®

TED® red lights are an essential tool to perform continuity tests & identify visual trouble on fibre. Localization of faults such as macro-bends, broken fibre, bad splices. Covers distances up to 10km.

#### Technical specifications:

- + Wavelength: 650nm (±10nm)
- + Laser class 3B (10mw)
- + Laser class 2B (1mw)
- + Output power: 10mW
- + Range up to 10km
- + Optical connector: 2.5mm (universal)
- + Protective cover for connector

#### Product benefits:

- + Ergonomic pocket-sized design
- + Protective cover for connector

#### Warning: Class 3B Laser

- Do not stare into beam
- The wearing of protective glasses is mandatory

TED®

## Power meters & optical light sources

### 2 in 1 power meter & 10mw visual fault locator

The TED® Optical Power Meter is a miniature, high-precision instrument with a built-in visual fault location. It performs performance measurements of passive optical links and finds faults. This pocket format combines practicality, lightness and performance.

#### Technical specifications:

TED® 33005	Specifications
Wavelength range (nm)	850 ~ 1700
Detector type	InGaAs
Measurement range (dBm)	-50~ +26
Accuracy (dB)	± 0.3
Calibrated wavelength (nm)	850. 1300. 1310. 1490. 1550. 1625
Resolution (dB)	0.05
Output power (VFL) (mW)	10
Estimated range (Km)	10
Transmission frequency	CW/2Hz
Operating temperature (°C)	-10~+60
Storage temperature (°C)	-25~+70
Automatic shutdown (min)	10
Operating time (h)	130 hours
Power supply	3 batteries AAA 1.5 volts/Micro-USB
Weight & Dimensions	70g (without batteries) 128 x 52 x 22 mm

PN	UV	Operating	Weight
33005	2 in 1 power meter & 10mw visual fault locator	3 AAA batteries	70g

PN	Description	Pack
17887	Protective laser overglasses	Unit

### 3 in 1 Optical fibre tester TED®

Essential tool for performing all key tests of an optical fibre link on a FTTx network. Traffic detection checks the possible presence of a signal on a fibre without disconnecting or disrupting the network traffic. It also indicates the direction of the signal. The visual fault locator (VFL) highlightst faults & defects of a fibre link such as bends and continuity ruptures. The optical power meter (OPM) measures the performance of optical links.

**Product overview:**

- + Signal detection
- + Identification of an active fibre
- + Isolate a potential damaged fibre
- + Signal direction
- + Indication of modulation frequency
- + Visual fault locator (VFL)
- + Continuous & flash modes
- + 10 mW output power
- + Power meter module (OPM)
- + Units of measurement : dBm/dB/  $\mu$ W
- + Wide wavelength range (850nm -1625nm)

**Features & Benefits:**

- + 3 in 1 tool. compact and ergonomic all in one fibre tester
- + 4 adapters to support most of fibre diameters (250 $\mu$ m; 900 $\mu$ m; 2mm; 3mm
- + Universal 2.5mm connector (SC/ ST/FC) for visual fault locator and power meter
- + Backlit color display
- + 24 months warranty

**Warning: Class 3B Laser**

- Do not stare into beam
- The wearing of protective glasses is mandatory

# Optical fiber identifier

## TED® Optical fibre identifier with signal direction

The TED® fibre optic detection clamp is an indispensable tool for telecom field engineers. It enables to detect the presence of a signal in the optical fibre without the need to disconnect it. By slightly pinching the fibre, a small part of the signal is diverted to 2 photodetectors and then measured to reveal the direction of the traffic and the relative optical power level. This operation can be performed on fibres in service.

Thanks to its adapters for 250 µm, 900 µm, 2 mm and 3 mm diameter sheaths, this tester is suitable for all applications and meets all needs:

- identify an active fibre
- isolate a problematic fibre
- evaluate the relative power level of the signal
- detect the direction of traffic
- detect a modulated signal at 270Hz, 1kHz and 2kHz

The TED® traffic detection clamp is a robust, field-proven design that comes complete with 4 adapters stored in a compartment, a light cover, 2 AAA alkaline batteries and a carrying case.

### Technical specifications:

- + Detection down to -50dBm
- + 270 Hz modulation detection, 1 and 2kHz
- + Compatible with G.652 / G.657 single-mode fiber
- + Right and left LED traffic direction indication
- + Set of 4 adapters 250 and 900µm, 2 and 3 mm included
- + Trigger for fiber retention and audible indication
- + Lightweight, robust aluminum case
- + Carrying case

# INSPECTION & CLEANING

## Inspection scopes

### FiberChek Probe Microscope

The FiberChek Probe builds on the VIAVI industry leading expertise in fiber inspection to deliver a single "all-in-one" handheld solution that every fiber technician can rely on for all of today's fiber inspection needs in a fully autonomous, handheld device. With built-in capabilities for image viewing, auto-focus, Pass/Fail analysis, storing/recalling results, the FiberChek Probe completely automates inspection workflows to ensure fast and accurate performance. Whether used as on its own or connected (WiFi, USB) to other devices, the FiberChek Probe is the essential fiber tool for every technician.

#### Product overview:

- + Integrated touch screen with real-time view of the connector
- + Automatic focus & centring
- + Clear pass/fail information
- + User-configurable threshold profiles
- + Generate report with fail/pass results
- + Compatible with FiberCheckPRO software
- + Magnification up to x200 & x400 for a detailed analysis
- + Specific adaptor on request
- + Carrycase

PN	Description	Operating	Weight
15925	FiberCheck probe microscope with 6 adaptors	Li-Ion battery	270g

#### Kit with 6 adaptors:

Connector adapters

2.5mm PC

2.5mm APC

1.25mm PC

Adaptors for feedthroughs

LC/PC

SC/PC

SC/APC

### Expert's advice

#### Make your networks more reliable!

Optical ferules contamination is the main source of failure on optical networks (up to 70%).

A small dust located at the core of the fiber could generate a major insertion loss & damage the fiber.

#### Contamination type:

## SmartPocket V2 OMK-35V2/-36V2

The VIAVI OMK-3xV2 optical test kits are a range of pocket-sized and rugged instruments for installing and maintaining single mode (SM) and multimode (MM) fiber optic networks. All test kits are equipped with an optical power meter and a dual or quad-wavelength optical light source for power level, insertion loss measurements, and continuity checks.

### Product overview:

- + Optical light source - OLSx (single or multi mode)
- + OLP35V2 power meter
- + Large LCD screen
- + Measurement unit (dB, dBm, W)
- + Measurement range for power level
- + 2.5mm SC/ST/FC connector adaptor
- + 1.25mm LC connector adaptor
- + Long battery life
- + USB data storage & extraction
- + Carry bag

### Technical specifications:

Specifications	OMK-35P	OMK-36P
Optical source type	OLS-35	OLS-36
Wavelengths	1310 / 1550nm	850 / 1300nm - (50/125µm); 1310 / 1550nm
Power output	-7dBm (monomode)	-20dBm (multimode); -7dBm (monomode)
Connector type	Interchangeable SC, FC	Interchangeable SC, FC
Ferrule type	PC	PC

PN	Description	Operating	Weight
11678	OMK-35P	4 LR6 batteries	600g
2099	OMK-36P	4 LR6 batteries	600g
12608	Adapter for 1.25mm ferrule	-	1g

## SmartClass Fiber OLP-87 PON Power Meter

The OLP-87 PON Power Meter enables simultaneous power measurement of all upstream & downstream wavelengths on live B/E/G-PON networks and is also compatible with next generation PON networks (XG(S)-PON, 10G EPON & NG-PON2).

### Product overview:

- + 3.5" colour touch screen
- + Calibrated wavelengths 1310/1490nm
- + Clear pass/fail information
- + Measurement unit (dB, dBm, W)
- + SC/APC connector
- + Compatible with P5000i inspection probe (as option)
- + PDF report through Smart Reporter software
- + Up to 10 000 results saved
- + USB interface
- + Carry case

### Technical specifications:

Specifications	OLP-87	OLP-87 XG-PON
Wavelength-selective power meter	✓	✓
Wide range of single mode wavelengths	✓	Option
Measurement range for power level	-50 to +13dBm	-50 to +13dBm
Number of calibrated wavelengths	1310/1490nm	1270/1310/1490/1550/1578nm
G-PON compatibility		
XG-PON & 10G EPON compatibility	✗	✓

# FAULT LOCATOR & IDENTIFICATION

## OTDR

### Applications SLM pour OTDR

The SLM intelligent optical software application helps technicians use an OTDR more effectively, without the need to understand or interpret OTDR results. Each event is displayed as an icon giving users a schematic view of the entire link, known as SmartLink. SLM can completely correlate to the original OTDR trace as experts desire. SLM displays OTDR results in a simple, icon-based map view (SmartLink), providing a clear diagnostic of detected issues.

### Product overview:

- + Makes OTDR result interpretation quick and easy
- + Immediately provides a clear diagnostic when a bad link element is detected
- + Directly correlates SLM view results and OTDR traces
- + Available for all SmartOTDR, T-BERD/MTS-2000, -4000 V2, -6000A platforms

PN	Application
15423	FTTH-SLM
16286	FTTA -SLM
16284	CABLE -SLM
16285	ENTREPRISE -SLM

### FiberCable 2 software for OTDR results processing

FiberCable 2 is a post-processing PC Software for fast and efficient viewing, editing, analyzing, and reporting of optical fiber test data carried out on all VIAVI MTS/SmartOTDR platforms. Fiber optic cable plant documentation allows better planning for future network upgrades and is essential during troubleshooting to help technicians find faults and fix them in a timely manner. FiberCable 2 easily generate compelling reports to record field data in a professional format. FiberCable 2 also adds the ability to generate high-fiber-count cable OTDR acceptance reports and fibercharacterization reports combining various test results in a single document (for example, OTDR, IL, ORL, PMD, and CD).

### Product overview:

- + Improve productivity by reducing data postprocessing times from hours to minutes
- + Manage multiple OTDR traces with automated, bidirectional alignment and analysis
- + Batch-processing/macro functions automatically perform repetitive actions and save results to a series of files
- + Generate professional reports to certify the work with onboard pdf report generation system
- + Edit and analyze multiple measurement files

Automated backup of OTDR traces on PC for simplified management of trace analysis and editing of recipe books.

PN	Application
12481	FiberCable 2

## Smart OTDR

The SmartOTDR essential handheld fiber tester is an affordable, easy-to-use device for techs at any level, with robust wireless connectivity options that increase productivity anywhere. It integrates all the essential fiber test requirements into a single device with OTDR measurement, fiber end face analysis, optical loss testing and visual fault locator.

### Technical specifications:

- + Large 5" touch screen
- + SC/APC connector
- + Integrated optical light source
- + Up to 10 hours operating time
- + USB driver & WiFi
- + Robust & flexible carry case
- + Smart link mapper software to quickly identify the type of fault detected

VIAVI

OTDR without add-on module

### Technical specifications:

Specifications	126A	126B	138FA65	136FB
Wavelength	1310 / 1550nm	1310 / 1550nm	1310/1550 and 1650nm filtered	1310 / 1550 and 1625nm filtered
Number of optical interfaces	1	1	2	2
Dynamics	37 / 35dB	40 / 40dB	37 / 35 / 32dB	40 / 40 / 41dB
Dead zone event	1.35m	0.9m	1.35m	0.9m
Dead zone attenuation	4m	2.5 m	4m	2.5m

PN	Designation OTDR Smart	Operating	Weight
19913	126A 1310 / 1550 SC/APC with SLM		
15424	126B 1310 / 1550 SC/APC with SLM		
15703	136FB 1310/1550 and 1625 SC APC filtered with SLM	Li-Po battery	900g
14887	138FA65 1310/1550 and 1650 SC/APC filtered with SLM		

Tri-lambda capable OTDR ideal for maintenance on an active optical fiber.

## Launch leads

### Launch lead singlemode

Fiber launch leads are essential elements in the optical reflectometry measurement chain. Their use is mandatory to validate and certify a fiber optic network. Their main functions are:

- Minimize the effect of OTDR dead zone
- Characterize input and output optical link connectors for which it is important to know the loss and reflectance values.

**Technical specifications:**

- + Light, compact & really handy
- + Pigtails secured outputs
- + 3mm reinforced pigtailed
- + Easy maintenance (do it yourself possible trough the integrated inner splice tray)

**Technical specifications:**

Lengths standard single-mode	500m, 1000m and 2000m
Pigtails length	1.5m
Pigtails surgainage	Ø3mm

## Fault simulator

### Single mode fault simulator launch lead SC/APC

Designed to train rookie fiber engineers dealing with fiber testing. This launch lead is a practise simulator with 4 type of typical fault networks. This tool is a must have for engineers who will be required to carry out tests and measurements on the networks

#### Product overview:

- + SC/APC connectors
- + 120m fiber link without any fault
- + 120m fiber link with a bad connector
- + 200m fiber link with a macro bend
- + 300m fiber link with 2 high loss splices

PN	Designation	Weight
13132	Single mode fault simulator launch lead SC/APC	880g

# ESSENTIAL TESTERS

## Cable tracing

### TED® copper pair tracer - locator

TED®

The TED® cable tracer is designed to locate and trace copper pairs in a rack, a distribution frame or a connection point during installation or maintenance operations. This tool is essential for anyone working on copper cabling for telecom and computer networks. In addition to detecting and tracing copper pairs, this kit allows for polarity detection, telephone line status verification, telephone line identification and continuity testing. It comes with a tone generator and an amplifier probe. The tone generator has an external 3-position switch to select the operating mode together with a 3-colour LED to indicate line polarity, continuity and voltage test. An internal switch located in the equipment allows to choose between a continuous tone or an alternative tone. The tone is audible and visible respectively through the speaker and LED on the amplifier probe. The wire on which the tone is generated is the one where the tone is loudest. The volume is adjustable for better identification of the wires and to avoid crosstalk with other wires. The volume can be turned off completely to avoid battery consumption.

#### Technical specifications:

- + Volume control and jack for use with headset or handset
- + On/off and volume disable button on the amplifying probe to limit power consumption and nuisance switching
- + Insulated and resistant probe tip to avoid short circuit risks
- + Electrical protection of the generator against lines supplied up to 110V AC/DC
- + RJ11 connector and 2 alligator clips available on the generator for connection to twisted pair, RJ11 socket and coaxial cable
- + Transport bag
